

Agents and signers can add a layer of security to signed documents by using the zipLogix Digital Ink® SMS Authentication to confirm the identity of a signer. This signer option prompts a signer to verify their identity before they can sign contracts. Agents can choose the SMS Authentication for one or more signers before sending for signatures.

ORDER	NAME / ROLE	EMAIL	CC	*CYBERSECURITY PROTECTION
1	First Equity LLC Buyer One	edwardc@car.org	<input checked="" type="checkbox"/>	SMS Authentication(\$) Mobile phone number
2	Mary Langdon Seller Two	edwardc@car.org	<input type="checkbox"/>	SMS Authentication(\$) Mobile phone number
3	Robert Langdon Seller One	edwardc@car.org	<input type="checkbox"/>	Choose a security option

## SMS Authentication

1. Click the box that says **Choose a security option** next to the signer's name
2. Choose from the drop-down menu **SMS Authentication**
3. Enter signers **Mobile phone number**
4. Click the **Next** Button

**Note:** After clicking the **Next** button, a screen will appear to pay for the SMS Authentication. The SMS Authentication is \$5 for unlimited verifications and signatures inside one zipForm® transaction..
